June 2011

Polish road tax / viaTOLL

The Polish authorities has decided to impose tolls on the Polish roads with effect from 1st July 2011. This in order to improve infrastructure and reduce air pollution from car exhaust gases.

The toll will be imposed all vehicles with gross weight exceeding 3500 kg and includes both motorways, express roads and highways. The road tax is distance-based and calculated on the basis of mileage rate, road category and vehicle emission category. All vehicles must from 1st of July be equipped with a so-called viaBOX electronically register and collect road tax.

Since this approach of course affects our costs significantly, we are unfortunately forced to charge Polish road tax for transport to / from Poland as well as for transport transiting Polish territory after 1st July 2011.

ZIP codes	Minimum DKK pr. consignment	DKK per 100 kg	DKK per FTL

1 cbm = 333 kg / 1 loading meter = 1850 kg

The toll will appear as a separate item on our freight invoices.

Your usual HCS contact person is of course available, if you have questions regarding the above.

We very much regret the circumstances, but nevertheless hopes for your understanding.

Sincerely,
HCS A / S Transport & Spedition
